

PROGETTO E-TWINNING – MOTHER EARTH

E-TWINNING PROJECT – MOTHER EARTH

ISTITUTI PARTECIPANTI / SCHOOLS

ITCG e Liceo Scientifico “Leonardo Da Vinci” di Poggiomarino (Nápoles, Italia – Italy)

ICS “E. Vittorini” di Messina (Sicilia, Italia – Italy)

IES Felipe Segundo, Mazarrón (Murcia, España - Spain)

IES Antonio Menárguez Costa (Los Alcázares, España – Spain)

ABSTRACT

There is no doubt that the Earth is a special planet. Not only because we live here but also because it is the only known planet in our galaxy that can support life. It is a beautiful planet filled with an enormous diversity of life, has amazing oceans, and provides all we need. So even if we, (as humans) feel separate from nature, we should care for it, we have nowhere else to live. In Mother Earth we intend to learn about the planet Earth, but also to consider our relationship to the natural world. As biologist Thomas Lewis wrote in *The Lives of a Cell*: “don’t think that Mother Earth is outside of you. Looking deeply, you can find Mother Earth within you, just as your biological mother who gave birth to you is also within you. She is in each of your cells”.

Information

Members:6

Membership: Italy (4), Spain(2)

Age range:13 -15

Subjects of teaching:

Biology, Cross Curricular, Environmental Education, Ethics, Foreign Languages, Geography, Informatics / ICT, Natural Sciences

Competenze chiave:

Citizenship, Digital, Personal, social and learning to learn, Science

DETTAGLI / DETAILS:

- LINGUA: Inglese
- PAESI COINVOLTI: Spagna, Italia
- DURATA: A.S. 2022/2023
- ORDINE E GRADO DI SCUOLA: Secondaria di primo grado e secondo grado.
- LANGUAGE: *English*
- COUNTRIES INVOLVED: *Spain and Italy*
- DURATION: *academic year 2022/2023*
- TYPE OF SCHOOL: *Secondary school*
